Pot O' Gold Series

Objectives:

- Provide a means for players to determine their rank of performance versus their peers.
- Provide championship recognition to an overall winner for a given time frame.
- Encourage repeat business to support the venue and its' charities.
- Provide a consistent branding for venue and charity marketing

Synopsis:

- By participating in the once daily Pot O' Gold (POG) Texas Hold Em tournaments at The Poker Room at Hampton Falls during a given period of time, players will earn points based on both participation and performance. These points will be the basis for entry into the final tournament at the conclusion of the event period.
- Players may play in as few or as many POG tournaments as they would like during the posted period. Points eligible events are listed below.
- In order to participate in the points tracking system, players will be required to sign up for a NO LIMITS VIP card by showing a valid ID.
- Tournaments will be run with no alterations to The Poker Room at Hampton Falls' tournament standards.

Points System:

- Each person participating in an eligible tournament will receive points for registering equal to the buy in, regardless of finishing position.
- All players participating in the posted prize pool will receive points equal to the amount of money won, plus the points they receive for registering
- Example: A player finishing 1st in a $100 buy in event with a 1st place payout of $500, would receive a total of 600 points; 100 for participating, 500 for finishing first.
- Points for each tournament, and overall point standings, will be updated and posted in writing at The Poker Room at Hampton Falls within 72 hours of completion of the event. The company website will also be updated with the point standings on a regular basis.
- At the completion of the scheduled POG events, the top 20% of all the point earners will be eligible to play in the POG Series final event.

Eligible Events:

- One multi table Texas Hold Em tournament per day will be designated a POG event.

Prize Pools:

- Prize pools for scheduled POG events will be calculated using current standards and processes and within NHRCGC rules.
- After establishing which portion of the buy-ins is the prize pool, an amount of a $100 for that event will be taken from the prize pool and held aside for the championship POG event.
- The remaining prize pool will be distributed as normal, using the poker room's posted prize distribution percentages for the number of participants in the event.

Championship:

- The Championship event will be held on a specified date after the completion of POG scheduled events. This is to allow management time to post final point standings and players time to determine if they are on the list of eligible players for the final.
- The event will have an entry fee and only eligible players will be able to register for final event.
- The event will be No Limit Texas Hold-'Em. All eligible players will begin the event with the same amount of tournament chips.
- The prize pool for the event will be the entire amount of prize monies held aside from the POG events plus the buy in amount for the championship event itself.
- The prize pool will be paid to the top 10 % of playing field, using the posted prize distribution percentages.

Benefits:

- Processes which include incentives for repeat entry have historically proven to increase overall participation. Increased participation results in larger tournament buy-in totals, which adds revenue for the venue, the charity and even the state. It also results in proportionally larger prize pools for the players.
- Charities hosting days when points events are held benefit from larger tournament fields as well as increased residual traffic at other house games.
- Charities hosting days when championship events are held benefit from increased residual traffic at other house games as well as a residual increase in participation in points events for that month.
- Players benefit by having larger prize pools to play for as well as the accomplishment of winning against larger fields of competition.
