Players open three windows on the back of the ticket. Winning symbol combinations are identified on the front of each ticket. All instant winners are determined by matching three identical symbols. There is a total of \$130 in instant winners in each deal.

There are also 15 “Hold” tickets that contain a Horse numbered 1 though 15, inclusive. The Horse winner (\$200) is determined by the first vertical column (the downline) to be called on the bingo board (e.g., for Horse 9 to win, the numbers B9, I-24, N-39, G-54 and O-69 would be called prior to any other vertical column being called.) It is only possible for there to be one “downline” winner of the \$200 prize. In the graphic below, Horse number 9 was the downline winner.

There are also two other downline winners of \$100 each. These winners are the Horse number one higher than the initial Horse winner and the Horse number one lower than the initial Horse winner. In the example above, Horse numbers 8 and 10 would each win \$100. If Horse 1 was the initial downline winner, Horses 15 and 2 would be the \$100 winners of the higher and lower Horse prizes. Similarly, if Horse 15 was the initial downline winner, Horses 14 and 1 would be \$100 winners of the higher and lower Horse prizes.

There are also a total of 75 bingo ball numbers in each game of Lucky 7 tickets (B1 through O75 inclusive). There are a total of 25 unique tickets within each game, each bearing three different bingo ball numbers. To start, after all the tickets in the deal are sold, the operator will announce when Downline Buddies with Serial #_____ will be played. At the designated time, the operator will begin drawing and calling balls from the Bingo mixing machine.

When the first ball is called, the holder of the ticket that corresponds to that ball will win \$100. Balls continue to be called until the downline winners are determined using the bingo mixing machine and the flashboard.
