

**GAMES OF CHANCE GAME PROCEDURES.**

**The name of the card game:** Blackjack, also known as 21

**The object of the card game:** The object of the game is for a player to have a hand closer to 21 than that of the dealer without going over. If a player is dealt an Ace and at the same time a 10, Jack, Queen, or King on the first two cards, the player has "blackjack" and will win 3:2.

**The rules of the card game:** The values of the cards are as follows: an Ace may count as either 1 or 11. A hand that contains an Ace is called a "soft" total if the Ace can be counted as either 1 or 11 without the total going over 21. If the Ace must be counted as 1 to prevent the hand from going over 21, the hand is then called a "hard" total. The cards from 2 to 9 are valued at their face value. The 10, Jack, Queen, and King are all valued at 10. In a dealer's hand an Ace represents 11.

Play begins from the dealers left and all players must wait their 'turn' to play. Players are not permitted to touch the cards. The dealer will stand on a soft 17. Side bets among players are not permitted. Players conduct at the table is proscribed by the house rules.

**The equipment used for the card game:** felt table indicating the location for placing wagers; standard playing cards, poker chips, dealer shoe, automatic card shuffler (optional)

**The method of play for the card game:** Once the bets are placed the dealer will deal two cards to the players. The dealer makes two passes around the table starting at the dealer's left (the player's right) so that the players and the dealer have two cards each. The dealer will flip one of his or her cards over exposing its value. After the cards have been dealt play proceeds around the table, starting at the first seat to the dealer's left. In the course of play if the player wishes to be dealt another card, the player will indicate this to the dealer by tapping the felt with a finger behind the cards, and/or announcing "hit". If the player does not wish to be dealt another card, the player will wave his or her hand over the cards and/or announce "stand". Hand motions will overrule any voice commands. When the hand is over, the dealer will move around the table to each position, in turn, paying winners and collecting losing wagers. The house takes \$1 on a push.

**The types of wager or wagers for the card game:**

Ante - chips are placed by the player in the designated position to indicate the desire to play a hand.

Splitting - after being dealt the first two cards, a player may choose to split thereby creating a new hand. An additional bet equal to the ante is required when cards are split. After a split, a hand consisting of an Ace and a 10, Jack, Queen, or King is not consider blackjack and only counts as 21.

Double down – allows a player to double his or her bet and receive only one additional card to the hand when the value of the cards is 10 or 11

The wager amounts for the card game: \$1, \$2, and \$4

The payouts and payout odds for each wager in the card game: Blackjack pays 3:2

The above is an accurate description of our rules and method of play for the game listed.
