### RE: Game Procedures – Rivers

Rivers is more of a combination of Texas Hold'em and Seven Card Stud.

- For most of every hand the Rivers Tournament will play exactly like Texas Hold'em
- After the betting action on the TURN the dealer will burn a card and deliver an individual FACE DOWN river card to all players remaining in the hand. At which time players remaining in the hand will make their best five card poker hand using their three hole cards and the four cards on the board.
- In the case of an all in the "river" card is still delivered face down to all players in the hand.
